### Re: Certificate of Material Compliance

Please accept this letter as confirmation and to certify the following statements with respect to product supplied by Trojan Industries Inc.

1. Products ordered (or specified by supplied drawings) as ASTM A48 (Gray Cast Iron) are poured in compliance with the ASTM specification and the foundry pours a representative test bar as specified by the standard with each heat. The test bar is then machined and tested according to the specification. Test bars must pass tensile requirements before the heat is released for finishing.
2. Products ordered (or specified by supplied drawings) as ASTM A536 (Ductile Iron) are poured in compliance with the ASTM specification and the foundry pours a representative keel block as specified by the standard with each heat. The keel block is then sectioned, machined and tested according to the specification. Test bars must pass tensile requirements before the heat is released for finishing.

Results from tensile tests or chemical analysis are available on request.

Should you require further information or have any questions or concerns, please do not hesitate to contact me directly.

Sincerely,

Krystof Lindenback, P. Eng
